DOLAPO OYEKANMI

FULL-STACK PRODUCT DESIGNER | DESIGN ENGINEER

+234 816 435 9161 | dfordolapo@gmail.com | Lagos, Nigeria

Portfolio: https://www.designwithdolapo.pro

PROFESSIONAL SUMMARY

Full-Stack Product Designer and UX Writer who takes digital products from problem definition to deployment. Combines product design, UX writing, and frontend and backend development to build functional web and mobile experiences. Uses AI-assisted development to ship end-to-end products, with a legal background that informs privacy-aware design and clear communication.

CORE SKILLS

Product & UX Design: Product strategy and problem framing, user research, user flows and journey mapping, interaction design, wireframing and prototyping, information architecture, UX writing and microcopy, usability evaluation, design systems, product requirements, developer handoff, Agile collaboration.
Design Engineering & Development: Responsive interface development, frontend implementation, backend integration, API integration, database-backed features, authentication and access flows, deployment and debugging.
Domain Specialties: E-commerce UX, SaaS products, admin dashboards and operational workflows, privacy-aware UX.

TOOLS & TECHNOLOGIES

Design: Figma, FigJam. Development & data: HTML, CSS, Next.js, Supabase, PostgreSQL, Resend, GitHub. Deployment: Vercel, Netlify. AI-assisted development: Claude, Gemini, Antigravity.

PROFESSIONAL EXPERIENCE

Freelance Product Designer & Design Engineer | Independent

Lagos, Nigeria | Jul 2026 to Present

- Design and build bespoke, template-free e-commerce experiences tailored to each business, combining distinctive visual concepts and unconventional interactions with intuitive navigation, practical functionality, and business requirements.
- Nail Express (nailexpress.ng): designed and built a bespoke press-on nail storefront that brings product discovery, custom sizing and shape choices, inspiration, and ordering into one coherent journey, reducing reliance on scattered inspiration and order details across WhatsApp and social media.
- Built connected storefront and admin workflows for product and inventory management, order processing, discount codes, delivery settings, and analytics, giving the business one central place to manage orders and store operations instead of tracking requests across separate social channels. Designed for responsive use with progressive web app support.
- House of Nina (houseofninauk.vercel.app): developing a bespoke e-commerce storefront for a UK hair and scarf business, with product variants and admin workflows for inventory, orders, discount codes, shipping configuration, and order tracking.
- TheToysVirago (thetoysvirago.shop), my own venture: designing and building an adult retail store with a privacy-first Stealth Mode that switches the storefront to a spreadsheet-style screen, giving users a discreet way to conceal the shopping interface when needed.
- Work directly with clients from scoping through design and full-stack implementation, connecting interfaces to databases, APIs, and product logic with AI-assisted development.

Creator, Product Designer & Developer | Vurdict

May 2026 to Jun 2026 | https://www.vurdict.site

- Created and built Vurdict, an AI-powered tool that reviews designers' portfolio case studies and identifies opportunities to strengthen their storytelling and presentation.
- Owned product definition, UX and interface design, frontend implementation, and backend integration for the portfolio review workflow, connecting the user-facing experience to the product’s underlying services.
- Launched and iterated on the product, with 82 design case studies reviewed to date.

- Integrated and shipped Vurdict as an installable progressive web app for desktop and mobile, with contextual error recovery and fixes following a security review.

Concept & Product Lead | Awwja | Moon Tech Life Community (ongoing alongside freelance work)
Remote, Lagos, Nigeria | Mar 2026 to Present

- Originated Awwja (awwja.vercel.app), a Nigerian market-culture e-commerce product built around price negotiation and branded seller stalls. Recognised with the Best Project Award by Moon Tech Life Community, where I served as lead.
- Defined product direction and designed key journeys, including onboarding, seller discovery, and a conversational bargaining flow that makes negotiation part of the buying experience.
- Created the brand identity, design system, brand voice, and UX writing approach. Used competitor analysis and product research to guide interaction decisions and coordinated team deliverables and stand-ups.

UI/UX Design Intern | FlexiSAF Edusoft Limited
Remote, Nigeria | Jan 2026 to Apr 2026

- Designed KitKeeper authentication across 16 screens and four user journeys for an equipment-management SaaS product, mapping access flows and account states to make sign-in and account access clear.
- Designed Distinction Creator Studio, a web-based course builder for educators, from research and personas through task flows and high-fidelity screens.
- Built a filter and search component for NexFlow in HTML and CSS for developer handoff, then deployed it on Netlify.
- Contributed to design sprints, user research activities, and heuristic evaluations to identify usability improvements.

UX Product Intern | PlayOps
Remote, London, UK | Nov 2025 to Jan 2026

- Turned community feedback into interaction ideas for interactive storytelling experiences and alternate reality games.

SELECTED PROJECTS

ShiftSync'd | *Healthcare* | *Product design project*
Designed a nurse handover experience covering ward selection, patient queues, patient-status communication, edge cases, and dark mode.

Scan2Supper | *AI-powered recipe generation* | *Product design and UX writing*
Designed onboarding and product experiences across 60+ screens, exploring AI-native UX patterns and clear guidance through recipe-generation tasks.

Àbójútó | *Healthcare* | *Mobile product*
Served as design lead for a community health-centre management system shaped around Nigerian healthcare workflows.

EDUCATION

National Open University of Nigeria | Criminology | 2024 to Present

University of Ibadan | Law | 2014 to 2019

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **AI-Assisted MVP Development & Product Thinking** (Dev and Design | Jul 2026)
- **UI/UX Design 100-Day Tech Challenge** (Moon Tech Life Community | May 2026)
